PATENTED "GREAT WALL" DESIGN

"Great wall" pattern design on the shoulders significantly improves the braking and cornering response of the vehicle and enhances handling performance.

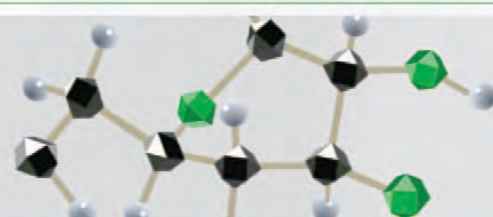

THE WIDER RUNNING SURFACE

Central reinforcement combined with staggered grooves effectively increase running surface, and improve wet grip performance.

SAFE AND QUIET PERFORMANCE

Four longitudinal grooves with Special sipe design has better drainage performance and significantly reduce the noise.

SUPER LONG MILEAGE

Super good carbon black formula reduces rolling resistance and saves fuel.
